

Job Title: Environmental Scientist

Location: Calgary, AB

Company: C.E.C. Innovations

C.E.C. Innovations is addressing the growing worldwide demand for analysis and understanding of water as it relates to One Health. With increasing awareness of the challenges of waterborne pathogens and chemical contaminants, C.E.C. Innovations is uniquely positioned as the leader in science-based, affordable, user-friendly and complete solutions for understanding water data.

Job Summary: Our subsidiary C.E.C. Analytics is seeking a committed and enthusiastic Environmental Scientist to facilitate our water sampling and study initiatives in remote communities. The ideal candidate will bring related field experience and expertise in Canadian water regulations, data analysis and reporting. The role requires periodic travel to remote locations, collaboration with local residents, and effective stakeholder management.

Key Responsibilities:

1. **Project Planning:** Develop project plans, timelines, and budgets for water sampling and study projects.
2. **Field Work:** Conduct on-site visits to remote communities for water sampling, ensuring compliance with established protocols and standards.
3. **Training:** For some projects, help train local residents in the use of our technology and ensure proper data collection and handling.
4. **Data Management:** Oversee the collection, analysis, and interpretation of water quality data and present findings to the team and stakeholders.
5. **Quality Assurance:** Ensure the quality and accuracy of data collection and interpretation.
6. **Reporting:** Provide regular project updates and reports to senior management and stakeholders.
7. **Compliance:** Ensure all activities adhere to relevant regulatory and safety standards.
8. **Ad Hoc Tasks:** Be adaptable and willing to take on additional responsibilities as required by the evolving needs of the organization.

Qualifications:

- Bachelor's or higher degree in environmental science, hydrogeology, or a related field.
- Proven experience in the field of water quality or environmental studies. Phase 1 and 2 Site Assessment experience would be an asset.

- Knowledge of water quality standards, regulations, and best practices.
- Strong analytical and problem-solving skills.
- Excellent communication and interpersonal skills.
- Ability to travel to remote communities and work in challenging environments.
- Flexible to adapt to changing project requirements and take on ad hoc tasks.
- Experience working with First Nations stakeholders is a plus.

Benefits:

- Competitive salary.
- Corporate benefits plan.
- Opportunity to make a meaningful impact on the health of communities.
- Dynamic work environment with opportunities for growth.
- Travel opportunities to remote locations.
- Engaging and collaborative team culture.

If you are a passionate and dedicated individual with a strong desire to drive positive change in remote communities, we encourage you to apply for the position of Environmental Scientist. Join us in our mission to provide accessible water solutions for communities everywhere.

To apply, please submit your resume and a cover letter outlining your relevant experience and why you're the ideal candidate for this role to info@cecinnovations.com.
